Intermediate Accounting III is a required course in the undergraduate program and critical for the accounting students’ academic success. The course primarily relates to the undergraduate
accounting program’s learning objective of conveying *functional knowledge* of financial accounting. In some instances, problems and assignments relate to promoting *awareness of the ethical responsibility of accounting professionals*. The content of this course directly relates to the School of Business learning objective concerning *quantitative fluency* as the assignments and problems are predominately quantitative relating to financial transactions in the context of audited financial statements and the financial position of reporting entities.
