Advanced statistical analysis with applications in business and economics utilizing relevant computer software. Topics include business applications in descriptive and inferential statistics emphasizing such topics as simple and multiple regression, analysis of variance, forecasting, quality control, and non-parametric techniques.

**Academic Prerequisite:**
MATH 250 covered probability concepts, descriptive statistics, binomial and normal distributions, confidence intervals, and tests of hypotheses. Although knowledge on these topics is expected, we will briefly review the most important topics in class. HOWEVER, THE PROFESSOR WON'T EXPLAIN IN DETAIL WHAT WAS EXPECTED FROM THE STUDENT TO LEARN IN MATH 250.

**Course Objectives:**
1. Interpret business data using descriptive statistics techniques, including the use of spreadsheet functions.
2. Apply simple concepts of probability distributions to business problems, solving for statistics (given probabilities) and probabilities (given statistics) for normal, t-Student, Chi-Squared and F distributions.
3. Use statistical tests to make inferences about a population based on a sample.
4. Apply hypothesis testing for one and two populations to test for means and proportions in business applications.
5. Apply ANOVA and goodness of fit for testing for differences among multiple populations in business applications.
6. Apply Chi-Squared tests and regression for testing relationships between variables for business decision-making.
7. Students can synthesize knowledge in different statistical tools to address sustainability problems.

This course addresses the following **School of Business learning goals**:
- **Goal I: Quantitative Fluency.** Students demonstrate competency in logical reasoning and data analysis skills. **Demonstration of Achievement:** Each student will be assessed using exams, homework, quizzes during the semester.

**Course Materials**

***Available in the Bookstore***
**CUSTOM WORKBOOK.**

**Teaching Method**
Lecture and videos, assigned reading, hands-on exercises, and problems. We will use e-learning as a support tool in the course, therefore, students should have the responsibility to learn how to use Excel (use the videos in Microsoft website to review Excel. The professor will assume you know ALL the tasks practiced in the videos posted in OAKS under Excel Basics). Any detailed questions about excel, should be done outside the classroom to avoid distracting class objectives.

All assignments, videos, assigned readings should be completed by CLASS start time on the assigned date. No late assignments will be accepted under any circumstances!!! Solutions to assignments are usually posted right after due date. All students are expected to have access to their account on OAKS and are responsible for keeping their email account active and check it frequently. I will have to use the official g.cofc.edu email account. Course materials and links to each module will be placed in OAKS and you should regularly check-in for announcements and updates, CHECK THE CALENDAR REGULARLY TOO.

The official computer hardware is PC-windows based. If you are a Mac user, you must learn on your own how to use StatPlus, which pretty much takes care of everything (except for histograms). All videos are using a windows environment. ALL EXAMS ARE TO BE COMPLETED IN A WINDOWS ENVIRONMENT!!!

Quizzes and exams are time restricted, no additional time is allowed. We evaluate in this class productivity, which means that completing tasks in a specified time is part of our evaluation. Computer failure/unavailability does not constitute an excuse for not completing assignments by the due date. The recommendation is to start homework as soon as it is posted, in that case, if you have a computer problem, you will have time to fix it before the due date/time. ALL VIDEOS ARE MANDATORY from start to finish!!!! You are expected to study at least 7 hours per week additional to class in order to successfully understand the material!

**Attendance Policy**
Attendance is required for every class session. Also, please be on time. Coming late is highly disruptive to everyone. To be early to class is to be on time. To be on time to class is to be late! The door will be locked once class has begun. If you...
show up after class has started, you will not be allowed to enter class.

- The combination of 3 absences (excused or unexcused) will result in the reduction of the final course grade to the next lowest grade (i.e. from B- to C+). Non-negotiable. Do not waste your allowed absences, keep them for when you really need them, i.e. sickness, family emergencies, etc. Excessive absences (five or more), excused or unexcused, will result in the student receiving a WA (an equivalent to an “F”)

- Quizzes, exams or in-class assignments (pop or announced) cannot be made up for ANY reason.

- It is your responsibility to obtain any material that you missed, but please get this from another student. You are ultimately responsible for information given in class, regardless of whether or not you were there. Emailing me to “see if we did anything important in class that you need to know about” is NOT the path to success in my class! I will not go over missed material in office hours. Again, you must contact a classmate and make sure you are ready before the following class.

- The appropriate use of technology for learning purposes is permitted. Students who are using cell phones at ANY time during class, you will be asked to leave and counted absent for the class. DO NOT GET ANGRY, OR YOU WILL SHOW DISRESPECT FOR SOMETHING THAT IS YOUR FAULT (not good). Just leave the class quietly and do not do the same the next class. Same rule applies if you behave rudely or are inconsiderate to all participants in class. If you are caught doing any of these more than once, not only you will have to leave class with an absence, but your course grade will fall by one letter grade (e.g. B to B-).

- Typing is distracted while material is being presented, therefore, laptops or tablets are not allowed for note taking. You are welcome to record the class, which is less disturbing or write notes the old fashion way.

- You must check your Charleston email (g.cofc.edu) regularly; you should not expect me to answer emails during Weekends or night time. My times to answer emails are 8:30 am to 5 pm. Every now and then I answer emails outside the set time, however, do not expect me to do so on a regular basis. Maximum time for me to respond emails during the week is 24 hours. If I have not responded to your email within this time, please send the email again, and make sure you do not send it to “quesadag@g.cofc.edu”. My email address is “quesadag@cofc.edu”.

E-mail Business Etiquette

eMail will be responded in 24 hours (except on Weekends). Do not abandon business etiquette in your use of e-mail!

I will not respond to e-mails if you do not follow the below guidelines:

- Business-like writing style (Dear Dr. Quesada, sincerely etc.)
- Be concise and to the point.
- E-mail alias so recipient sees your full name, or your full name with @g.cofc.edu, in his/her e-mail inbox.
- Subject line meaningful to recipient (identify your class DSCI-232-02).
- Always include this as your subject line!!! Including section number (02).
- Content clearly states the purpose of the e-mail including any action to be taken from the professor.
- Be careful about including quotations and sayings in your signature block. Obviously don't include anything that has potential to be offensive or misunderstood. Think about the impression your message sends to someone who doesn't know you, and be judicious.
- Although I expect you to be working on the course during weekends, you should not expect me to answer emails during Weekends or night time. My times to answer emails are 8:30 am to 5 pm. Every now and then I answer emails outside the set time, however, do not expect me to do so on a regular basis. Maximum time for me to respond emails during the week is 24 hours. If I have not responded to your email within this time, please send the email again, and make sure you do not send it to “quesadag@g.cofc.edu”. My email address is “quesadag@cofc.edu”.

Grading Structure

Your grade is not determined by how much time you put or how “hard” you feel you worked. It is actually on what you produce, the quality of your assignments and tests. Grades are yours to earn, not mine to give!

Exams…………………………………….55%

Homework…………………………………30%

Quizzes…………………………………….15%

An “A” is reserved for truly excellent work. If you earn an “A”, you went above and beyond the call of duty not just with your efforts but also with your performance.

A “B” indicates very good work. You did not just do the minimum requirements but you made an extra effort to show your skills, and your effort showed.

A “C” means you did average work, you did what was asked and you did it satisfactorily – nothing less, nothing more.

A “D” means you need to improve – you did below the minimum requirements.

An “F” is guaranteed if you turn very poor work or you rarely participate in class.

Grading Structure

- Quizzes: 15%
- Exams: 55%
- Homework: 30%
CofC Honor Code
Lying, cheating, attempted cheating, and plagiarism are violations of our Honor Code that, when identified, are investigated. Each incident will be examined to determine the degree of deception involved. Cases of suspected academic dishonesty will be reported directly by the instructor and/or others having knowledge of the incident to the Dean of Students. A student found responsible by the Honor Board for academic dishonesty will receive a XF in the course, indicating failure of the course due to academic dishonesty. Students should be aware that unauthorized collaboration-working together without permission- is a form of cheating. Unless the instructor specifies that students can work together on an assignment, quiz and/or test, no collaboration during the completion of the assignment is permitted. Other forms of cheating include possessing or using an unauthorized study aid (which could include accessing information via a cell phone or computer), copying from others’ exams, fabricating data, and giving unauthorized assistance. Research conducted and/or papers written for other classes cannot be used in whole or in part for any assignment in this class without obtaining prior permission from the instructor. Students can find the complete Honor Code and all related processes in the Student Handbook.

Each student is expected to complete their own work in assignments/quizzes/exams without additional help.

Technology Requirements
Hardware:
- Computer with high speed internet access, WebCam, sound and video card (to play videos and have skype office hours).

Software:
- Microsoft Office 2010 or higher (Windows Version).

If you have a Mac, you can still use it for everything we do in class, but you will have to learn it on your own, if they happen to be different from the Windows version. If you are a Mac User, you must install StatPlus (for free) and learn how to use it on your own or use formulas such as “AVERAGE(), STDEV(), COUNT()”.
- Adobe Flash Player, Adobe Reader
- OAKS (you must check in OAKS everyday: Calendar/Assignments/New Videos, etc)
- Skype for online office hours: drquesada.cofc (you have to make an appointment since I don’t have it active all the time)
- Remind101 (texts or emails)

For help with basic Excel material that is not covered in the class:
- The Student is expected to have some Excel knowledge. If you lack this knowledge, please all videos posted under CONTENT-VIDEOS/TUTORIALS-EXCEL BASICS, in OAKS or click on the icons below.
- These videos/tutorials are mandatory and students should be able to duplicate all the material learned in those videos after the first week of class. The professor will assume the topics explained in these videos/tutorials are the base knowledge of all students after the first week of class!!!
- Links to all videos are posted on OAKS, including videos for Microsoft Office 2003-2010 and Mac.

Technical Support
If you have technical problems, please contact the Student Computing Support Desk at 843.953.5457 or email StudentComputingSupport@cofc.edu. Check for computing downloads and tutorials at blogs.cofc/scs/

Resolve problems promptly. Computer failure/unavailability does not constitute an excuse for not completing assignments by the due date. You must not leave homework/quizzes/exams to the last minute! The professor won’t provide any technical assistance on connect or any computer related problem, you must use either Connect technical support or Student Computer Support Desk.

Missing Exams
- No makeup exams/quizzes will be given.
- Dates for exams are posted in the Calendar since week 1. If changes are made, the professor will notify them at least a week in advance.
- There will be NO MAKE UPS under ANY circumstances.
- A dropbox in OAKS will be opened to submit files during exams.
- EXAMS AND QUIZZES ARE CLOSED BOOKS/CLOSED ADDITIONAL MATERIALS AND ARE INDIVIDUAL WORK. THE HONOR CODE WILL APPLY!!!!
MAJOR TOPICS COVERED

- Introduction: Descriptive Statistics.
- Continuous Probability Distributions: Normal, t-Student, Chi-Squared and F.
- Interval Estimation.
- Hypothesis Testing – One Population
- Hypothesis Testing – Two Populations
- ANOVA Single Factor
- Simple Regression
- Multiple Regression
- Goodness of Fit Test
- Test of Independence
- Interval Estimation.

EXCEL ADVANCED FEATURES

- Test of Independence
- Goodness of Fit Test
- Multiple Regression
- Simple Regression
- ANOVA Single Factor
- Hypothesis Testing – Two Hypothesis Testing – One Population
- Interval Estimation.
- Continuous Probability Distributions:
  - Introduction.
  - Descriptive Statistics.

Homework Policy

- Self-grading has many benefits. If you grade your own homework, you see exactly where your mistakes are. You also obtain feedback sooner than if the instructor collects the homework, grades it, and then, returns it some days later.
- The day that homework is due, the professor will show you the answers in the first 5 minutes of class. You must have a red-ink pen and a copy of your homework so you can make corrections. If you make the corrections and upload it in OAKS Dropbox under Homework corrections. This counts for 10 points towards your homework grade.
- You must correct mistakes on your work using a different colored writing utensil. You must write a note about what you missed (such as math error or “wrong test statistic formula” or “did not multiply by 2”). Your student id number and HOMEWORK NUMBER should be on top of the first page.
- Write the score for each problem and the score for the whole assignment at the top of the front page. This must be submitted by 11:59 pm on the date that homework is due (use Genius Scan app to create a SINGLE pdf file to upload in OAKS).
- You must submit a scanned copy of your corrected homework in OAKS (create one single file with the name of the homework corresponding to the HW number). If you did not submit the original hard copy of homework, you CANNOT submit a self-graded homework in OAKS, or if you do, you don’t get any points.
- ONLY ONE FILE SHOULD BE SUBMITTED EACH TIME. IF YOU HAVE MULTIPLE PICTURES, JUST CREATE A WORD DOCUMENT AND ADD EACH IMAGE TO A PAGE, MAKE SURE IT IS READABLE AND CLEAR. ALL HOMEWORK SHOULD SHOW THE WORKINGS ON BOOK TEMPLATES ASSIGNED.

- All homework requires complete solutions that include all diagrams, formulas, all parts of the templates completed (even if it is not requested in the online version of the homework) for it to be 100% correct. Please do not rely on incomplete solutions, all students should work hard on homework to prepare for tests. If you don’t have complete solutions in the Dropbox or the solutions don’t match the self-graded submissions, your grade will drop to 0 even if your quiz grade is 100.
- Failure to submit the self-graded homework results in a grade of 0 for that particular assignment. The same rule applies if the student does not complete all the work in the designated templates on the book with complete formulas, diagrams, etc.
- Homework 1 does not require a self-graded homework submission.

Complaints about Exams Grading

- The professor encourages students to review in detail when exams/ quizzes are returned. You have 3 working days after the graded evaluation is turned back to you to make any questions or complaints about it. If that time is passed, it means you have accepted the grade given and no further complaints are accepted.
- No complaints are accepted for any reason if the 3-day period has passed (non-negotiable).

Miscellaneous Policies:

- Although I will try to maintain the class schedule and objectives, I may need to make adjustments. You are responsible to check OAKS schedule for the most recent calendar of activities and dates. Don’t ask the professor about exams dates, since he/she will not give you as accurate information as the OAKS schedule.
- The professor does not give additional projects to increase students’ grades before or after the exam(s). The professor does not round grades, a 59.9 total grade is an F.
- No food or drinks allowed in the lab. This is a School-wide policy, non-negotiable!
- The professor has the right to disable OAKS at 8 am on exam days. You still have your book to study last-minute concepts. However, plan accordingly that you will have no access to data or videos or any other material in OAKS.
- Homework is individual work, and should be completed only by the student taking the course!!!
