CLASS TIMES: TR 5:30 PM TO 8:15 pm

E-mail: USE ONLY OAKS

If the College of Charleston closes and members of the community are evacuated due to inclement weather or other unforeseen circumstances, students are responsible for taking all of their course materials with them in order to continue with course assignments consistent with instructions provided by faculty. During the period of the College’s closing, students may be expected to find Internet access for e-mail communication and access to course materials in OAKS. In cases of extended periods of power outages where students have relocated, instructors will articulate a plan that allows for supplemental academic engagement despite these circumstances.

E-mail Business Etiquette Please Follow the guidelines

Do not abandon business etiquette in your use of e-mail! I will not respond to e-mails if you do not follow the below guidelines:

- Business-like writing style (Dear Dr. Gonzalez, Dr.G, Sincerely, etc.)
- Be concise and to the point. • E-mail alias so recipient sees your full name, or your full name with @g.cofc.edu, in his/her e-mail inbox.
- Subject line meaningful to recipient (consider identifying your class SCIM 360-01. Always include this as your subject line!!! Including section number.
- Content clear states the purpose of the e-mail including any action to be taken from the professor.
- Clear signature block with your full name, postal mailing address and return e-mail address (obviously there is no handwritten signature, nor do I require a digital signature). Be careful about including quotations and sayings in your signature block. Obviously don't include anything that has potential to be offensive or misunderstood. Think about the impression your message sends to someone who doesn't know you, and be judicious.

Course Description:
Advanced statistical analysis with applications in business and economics using relevant computer software. Topics include business applications in descriptive and inferential statistics emphasizing selected topics such as simple and multiple regression, analysis of variance, time series analysis, and non-parametric techniques (tentative).

Prerequisite
MATH 104 (Elementary Statistics), which covered probability concepts, descriptive statistics, binomial and normal distributions, confidence intervals, and tests of hypotheses. Although knowledge on these topics is expected, we will briefly review the most important topics in class. IT IS THE STUDENT RESPONSIBILITY TO REVIEW THE NECESSARY CONCEPTS TO DO SATISFACTORY IN THIS COURSE (CHAPTERS 1 TO 5)

The student is expected to have some Excel knowledge. If you lack this knowledge, please review:

- How to install analysis tool-pack
  - https://www.youtube.com/watch?v=uBHo7EVIGW0
- How to enter simple formulas
  - https://www.youtube.com/watch?v=DBccIAl0Axs
- Troubleshooting with formulas
  - https://www.youtube.com/watch?v=JST-JEZm9I
- How to create charts
  - https://www.youtube.com/watch?v=c70cjQXWkFl
- Pivot tables
  - https://www.youtube.com/watch?v=Ldm3LH4b0z0
1. School of Business Learning Goals:

Quantitative Fluency:
Students will gain experience and training on advanced functionality in Microsoft Excel to support information management and decision-making

Problem Solving Ability:
Every class for solving statistics problems in business applications.

2. Learning Objectives:

2.1 Interpret business data using descriptive statistics techniques, including the use of spreadsheet functions.
2.2 Apply simple concepts of probability distributions to business problems, solving for statistics (given probabilities) and probabilities (given statistics) for normal, t-Student, Chi-Squared and F distributions.
2.3 Use statistical tests to make inferences about a population based on a sample.
2.4 Apply hypothesis testing for one and two populations to test for means and proportions in business applications.
2.5 Apply ANOVA and goodness of fit for testing for differences among multiple populations in business applications.
2.6 Apply Chi-Squared tests and regression for testing relationships between variables for business decision-making.

3. Course Objectives:

3.1 Compute and interpret sample mean and standard deviation
3.2 Determine confidence intervals for the population mean and proportion
3.3 Test hypothesis about population mean and proportion
3.4 Test hypothesis comparing two population means
3.5 Test hypothesis comparing two population proportions
3.6 Cover simple and multiple regression and the application of the regression approach to time series forecasting and analysis of variance.
3.7 Discuss analysis of variance and its applications.
3.8 Chi square test
3.9 Develop skills in using Excel and other software for data analysis.

4. Course Expectations

As your teacher I have the following responsibilities:
4.1 Come prepared to every class.
4.2 Plan my class so you can accomplish the objectives listed in the syllabus.
4.3 Treat you as responsible adults.
4.4 Consider that it is not always your fault if you don’t understand the material.
4.5 Create a mutually respectful classroom environment.
4.6 Encourage you to ask and answer questions.

As students you have the following responsibilities:
4.7. Come prepared to every class.
4.8 Complete all work on time with proper thought.
4.9 Behave as responsible adults.
4.10 Consider that it is not always my fault if you don’t understand the material.
4.11 Treat others with respect.
4.12 Be familiar with basic functionalities of Microsoft Excel.
4.13 Learn the statistics software outside the classroom with guidance from the professor during office hours (SPSS, Minitab).

5. Text and Course Materials:

CUSTOM WORKBOOK.

6. Grading and Evaluation:
### Grading Scale

<table>
<thead>
<tr>
<th>Performance</th>
<th>Letter Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>High Superior</td>
<td>94-100 A</td>
</tr>
<tr>
<td>Superior</td>
<td>90-93.99 A-</td>
</tr>
<tr>
<td>Very Good</td>
<td>87-89.99 B+</td>
</tr>
<tr>
<td>Good</td>
<td>84-86.99 B</td>
</tr>
<tr>
<td>Acceptable</td>
<td>80-83.99 B-</td>
</tr>
<tr>
<td>Fair Good</td>
<td>77-79.99 C+</td>
</tr>
<tr>
<td>Fair</td>
<td>74-76.99 C</td>
</tr>
<tr>
<td>Acceptable</td>
<td>70-73.99 C-</td>
</tr>
<tr>
<td>Barely Acceptable, Passing</td>
<td>67-69.99 D+</td>
</tr>
<tr>
<td>Fair</td>
<td>63-66.99 D</td>
</tr>
<tr>
<td>Fail</td>
<td>60-62.99 D-</td>
</tr>
<tr>
<td>WA</td>
<td>&lt; 60 F</td>
</tr>
<tr>
<td>XXF</td>
<td></td>
</tr>
<tr>
<td>Withdrawn Excessive Absences (equivalent to F)</td>
<td></td>
</tr>
<tr>
<td>Failure due to Academic Dishonesty</td>
<td></td>
</tr>
</tbody>
</table>

### Exam Weightages

- Exam 1: 15%
- Exam 2: 15%
- Exam 3: 15%
- Quizzes/Assignments (Random, at least one per chapter): 40%
- Project: 15%

### 7. Teaching Method

Lecture, assigned reading, hands-on exercises, and cases. We will use e-learning as a support tools in the course, therefore, students should have the responsibility to learn how to use Excel, and other statistical software. **Any questions about excel, SHOULD be done outside the classroom to avoid distracting the class objectives.**

### In-Class Exercises

Each class session will consist of a period of lecture/demonstration, followed by a period of in-class exercises. The exercises will consist of hands-on computer exercises, which will serve as the primary means for you to learn to use the software applications covered in this course, so take them seriously. In order to learn how to use any software application, you must practice **using them**...just watching and following along during the lecture period won't do it. You must be sure that before you leave the class you are capable of completing the exercises on your own. The in-class exercises are representative of what you will have to do on the exams; if you cannot work through the in-class exercises yourself then it is not likely that you will be able to pass the exams. **You should also spend at least 5 hrs. per week outside the class working on the cases to fully understand the material covered in class. This time should allow you to understand the topics and apply them to solve real world problems.**

### 8.0 Policies and Procedures

It is important for you to attend, and to be on time for, each meeting of DSCI 232 because in-class time is important to ensuring full understanding of the material. Attendance is taken every class, and absences and tardiness are recorded. If you are more than 10 minutes late (excuse or unexcused) you will have 0.33 absence. Do not be physically present (excuse or unexcused) an absence will be registered.

8.1.1 Students are expected to attend classes. You cannot expect to have a thorough grasp of the material if you miss class. You are responsible for all material or assignments that are covered in class.

8.1.2 Students ARE ALLOWED TO MISS only 2 classes (excused or unexcused). Understand that a physical absent is the act to do not be present in the class).

8.1.3 For each additional absence your final grade will be reduced by 5 points, **If you miss more than 5 sessions (3 additional of the limit stated in 8.1.2) the professor will drop you for excessive absences. This policy is NON-NEGOTIABLE. You don’t have to come to the professor to excuse your absence, any absence counts for this rule!!**

8.1.4 Attendance will be taken at the beginning or end of each period. **Don’t bother to justify your absence since both justified and unjustified absences count for this rule.**

8.1.5 If you miss a session, the professor WON’T repeat the missed material on office hours, it is your responsibility to read on your own and ask your classmates for missing concepts.

8.1.6 If you leave the classroom without a justification an absent will be register that day in your records.

8.1.7 If you miss a session, the professor WON’T repeat the missed material during office hours, it is your responsibility to read on your own and ask your classmates for missing concepts.

8.1.8 If you miss class and the next class (es) you ask for material covered during your missed class; the professor won’t answer the question. **You must use OAKS mail to contact your classmates and recover from the missing class. The OAKS calendar will let you know what chapters you missed, and you must read and understand all the material before coming to your next class.**
8.1.9 Use your two allowed absences wisely. If you know you have a commitment that require you to miss class, then plan accordingly so you do not exceed two absences during the semester. Please see your instructor (in his office) if you have an exceptional situation that requires you to exceed two total absences, such as a severe or prolonged illness, medical or family emergency, sport commitment, everything MUST be presented to the instructor BEFORE your absence. After you miss the class, any justification will be allowed.

8.2 Missing Exams

8.2.1 No makeup exams will be given. It is impossible to make an equivalent exam without the student at either an advantage or disadvantage.

8.2.2 If a student misses an exam without a legitimate excuse, you will receive a grade of zero for that exam/quiz/assignment.

8.2.3 If a student misses one exam with a legitimate excuse (approved by me and justified before the evaluation is make it) you can either choose to receive a grade of zero or do the missing evaluation the last day of classes, at the same time that the class and with none special options, if you miss 1 test and 2 quizzes for example, you need to do the missing evaluations the same day in in the same amount of time that was given to the rest of the class.

8.2.4 Any extra credit/or additional help given during a regular test will not offered if you do a make-up (need to be fair with the students that did the evaluation in the correct day)

8.2.5 Arriving late or leaving early will count as an absence. Leaving early - if you have to leave class early you must notify me at the beginning of the class and sit by the door so your departure will not disturb the class. Arriving late - if you are more than 5 minutes late to class, I reserve the right not to allow you into the classroom. If you are late, you will miss the evaluation of the day (QUIZ/ASSIGNMENT/TEST).

8.2.6 Last day for students to withdraw with a grade of "W" from Express I classes is Monday, March 25

8.2.7 Extra credit or any special offers to increase student’s grades outside what is stated in this syllabus are a reward for those that actively participate in class. If you miss 2 or more absences, you accept that you will not be eligible for any extra credit or offers beyond the grade distribution stated in this syllabus.

THE PROFESSOR DOES NOT PROCESS INSTRUCTOR WITHDRAWLS FOR ANY REASON

9.0 College of Charleston Honor Code

All work that you submit in this course must be your own; unauthorized group efforts will be considered academic dishonesty. This is particularly important with regards to assignments and exams. The sharing or copying of program files (e.g., spreadsheets) is a form of plagiarism. Academic dishonesty is a serious offense, which may result in a failing grade for the course and/or report to the Honor Board for evaluation. If copying is involved, both parties will be judged equally guilty. Any paper submitted with more than 5% copied from other sources (Turnitin report) is considered plagiarism and will get a grade of 0.

10.0 Professional Behavior Guidelines

10.1 Class sessions will be conducted on a lecture-discussion basis, focusing on the key concepts and issues relevant to the theory and practice of production and information technology. I will post class materials and grades on the course Oaks website accessible ONLY to students enrolled in this course. You are expected to access this website on a regular basis to download copies of my lecture slides, additional reading materials, check homework solutions, complete quizzes and review your grades. You MUST have access to a reliable Internet connection and computer for this course. There are a large number of computers with broadband Internet connection across the College campus. So if you do not have a computer at your home, you will be expected to utilize the College computers or another comparable source of Internet connection. Class participation is an important and a required component of this course. Participation extends beyond class attendance to include asking questions (in and out of class), involvement in class discussions and identifying current examples relevant to the course subject matter. ALL CELL/DIGITAL PHONES, PAGERS, PDA’S OR OTHER ELECTRONIC EQUIPMENT MUST BE TURNED OFF BEFORE ENTERING THE CLASSROOM. If your phone, pager or PDA rings or vibrates during class you will be asked to leave the classroom and I reserve the right not to allow you to return for the remainder of the class.

Students are expected to act in a professional manner at all times during class. No food should be eaten during class and all pagers, cell phones and other electronic equipment should be turned off during class.

10.2 Tardiness: Please arrive on time. If you are later th

://an the start of the class for three times in the semester, it will count as one missed class. Tardiness to and early departure from classes accrue on a real-time equivalency, with the potential for a cumulative effect of absences.
10.3 Side Conversations: Side conversations make it difficult for your classmates to actively listen and learn. Sleeping: falling asleep in class is not considered professional behavior.

10.4 Inattention: Please don’t read other material (chat, browsing the web, books) or study for other courses during my class. It’s not polite. Please pay attention and join in the individual and group discussions. It will help you master the material.

10.5 The appropriate use of technology for learning purposes is permitted when instructed by the professor. Students who are using cell phones at ANY time during class will be asked to leave and it will count as absence for the class. DO NOT GET ANGRY, OR SHOW DISRESPECT FOR SOMETHING THAT IS YOUR FAULT. Just leave the class quietly and do not do the same the following classes. Same rule applies if you behave rudely or are inconsiderate to any participants in class. If you are caught doing any of these more than once, not only you will have to leave class with an absence, but your course grade will fall by one letter grade (e.g. B to B-).

Typing is distracted while material is being presented, therefore, laptops or tablets are not allowed for note taking. You are welcome to record the class, which is less disturbing or write notes the old fashion way.

You must check your Charleston email (g.cofc.edu) regularly; you should also correspond with me through this account only. As part of the FERPA privacy laws, we are expected to communicate through the college's email system, so following this policy is ultimately in your best interests.

10.6 Printing: Do not print outside work during class. I will turn off the printer at the beginning of class to prevent any interruption to the class.

10.7 Navigating or other computer tasks different than class matters: It is not polite to be doing course work or assignments other than the ones required in class. Also, it is not polite to navigate internet or check email while in class. One point will be taken out from your final grade for every time you do this in class. If you finish your work before other classmates, you might ask for permission to do other work in the computer and until given, you should not do other work.

11.0 Miscellaneous Policies

11.1 Although I will try to maintain the class schedule and objectives, I may need to make adjustments.
11.2 I do not give additional projects to increase one’s grade before or after the exam(s).
11.3 No food or drinks allowed in the lab.
11.4 Finally: If a problem develops during the semester or if you feel you need extra assistance with concepts in the course, do not hesitate to come to my office for help. The last thing I want is for you to do poorly in the course. **Use my office hours for your benefit. That’s why I have them.**

11.5 No Office Hours the TEST Day
